DNA (Grade 5)

By Wendy Conklin

TEACHER CREATED MATERIALS, United States, 2015. Paperback. Book Condition: New. 224 x 173 mm. Language: English . Brand New Book. DNA is known as the blueprint for life! Found in every cell of every living thing, DNA strands are packed inside a cells nucleus carrying instructions and genetic information. Climb the double helix ladder and crack the DNA code in this fact-filled life science book to explore genetics and why parts of you may appear identical to your great, great, great grandparent. Fifth-grade readers will learn about DNA structure and replication, proteins and genes, chromosomes, inherited traits and alleles, cloning, and more through this high-interest informational text filled with vibrant photographs. Aligned to the Next Generation Science Standards, a hands-on "Think Like a Scientist" lab activity and a "Your Turn" page at the end of the book support STEM Education and provide young scientists with an opportunity to apply what theyve learned in the text. Helpful diagrams, a timeline of genetic discoveries, and text features, such as a glossary and index, are also included to reinforce content-area literacy and improve close reading.

Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Otis Wisoky**

This publication is great. It is full of wisdom and knowledge You will not really feel monotony at any time of the time (that's what catalogs are for relating to when you ask me).
