Brand New Book ***** Print on Demand *****.Excerpt from Experiments in the Hand-Feeding of Cows: For Milk and Butter Production The tests enumerated in this paper were commenced in the second week of March by Messrs. Crawford, of Normanville; Wyllie, of Kapunda; and Ridgway, of the Grange, and continued until the end of May. To these gentlemen, who carried out the respective duties of weighing the food, taking the fat percentages, and weighing the milk, I am greatly indebted; and I can assure readers that all precautions were adopted to furnish reliable results. Along with the above duties Mr. Crawford kept a register of the cream returns, and a full account of the churning and butter manufactured throughout the working of the experiment. Mr. Wyllie did likewise, and extended the testing by conducting other experiments of an important character. In the special milk and acidity determinations I have to thank Messrs. Lauterbach, of Wilmington Dairy Factory; Davidson, Millicent; and Leditschke, Point Pass; and Mr. Goyder, F.C.S., Government Analyst, for a number of quantitative analyses of samples of butter, Determinations and Analyses Made. The following are the total number of samples tested, weights of milk taken, together with the quantitative analyses of butter and milk. In reviewing the work accomplished it must be made clear that the feeding trials were not conducted with a view to test the merits of a large number of rations, but to find out the best of those practised in the State. To furnish authentic proof of the qualities of foods given it would be necessary to carry on experiments for months, and to allot for each particular mixture a term of feeding that would extend for at least fourteen...
